Introduction	Alpha Five Application Server - V8 and V9–Platinum.....ix
	What this book is all about ix
	Pick & Click charts ix
	Boy (and girl) are you lucky! ix
	Acknowledgments x
	Special note for Alpha Five Made Easy readers.....x
	Clean A5webroot x
	Getting Startedxi
	About Alpha Five Web Applications Made Easy xi
	What you need to know xi
	The equipment you will need to have xii
	How this book is set up xii
	Footnotes xii
	Tips on searching the A5 Help files xii
	To quote or not to quote xii
	About the screen shots xiii
	Installing the lesson files..... xiii
	Windows Vista xiii
	Windows XP xiii
	Windows 2000 xiii
	Windows 98 xiv
	What’s on the CD? xiv
	Opening the companion database filexv
	Completed examples.....xvi
1 Sensational System	How the material is organized3
	Understanding web based databases.....3
	How the Alpha Five web system works 4
	Web Components 4
	Using the Alpha Five web component builders 4
	Alpha’s brilliant idea 5
	Understanding SQL back-end databases 6
	Location 7
	Server requests 7
	Security 7
	How Alpha Five interacts with database types 8
	Web Projects Control Panel 8
	Developing applications 8
	Using your application on the web 9

Adding even more power 10

Understanding the Application Server System 10

 Creating a web application 10

 Understanding Web Components 10

 Grid Component 10

 Dialog Component 12

 Gridlinker Component 12

 Tabbed Gridlinker component 12

 Navigation System 13

 Login Component 13

 Maintenance Component 13

 Using the web page editor 13

 Built-in HTML editor 13

 Web Component place holder 14

 Viewing the page in your browser 14

 Working in WYSIWYG 14

 Changing pages 15

 Putting it together 15

2 Marvelous Moves

How the material is organized..... 19

Preparation for the lessons 19

Creating a Web Project..... 19

 Scenario 19

 Open Web Projects Control Panel 20

 V9-Platinum Edition 21

Creating a Grid Web Component..... 21

 Component Type 22

 Read Only vs. Updateable 23

 Defining the Grid Data Source 23

 Defining the Grid Query 24

 Linking table 24

 Filter 24

 Sort order 24

 Sort direction 24

 Selecting fields for the Grid 24

 Row numbers 25

 Record Numbers 25

 Setting the field properties 25

 Detail View Link 26

 Email link 26

 Defining the Grid Properties 27

 Setting up the Search part elements 28

 Search Fields 28

 Search Properties 28

 Setting up the Detail View part elements 29

 Detail View Fields 29

- Detail View Properties 29
- Defining Events for the Grid component 30
- Annotating the Grid component 30
- Saving the Grid component 31
 - Component names 31
- Previewing the Grid component 32
 - Testing at Live Preview Tab 33
 - Testing the Grid component 33
- Creating a Web Page.....35
 - A5W Pages 35
 - Adding an Image to the both page and project 35
 - Tabs 37
 - Creating page that holds a web component 38
 - Finding the URL Address 39
 - Creating a hyperlink 40
 - Inserting a Web Component on a web page 41
 - Grid Component place holder 42
 - Deleting a web component 43
- Viewing and using the Web Project43
 - Execute vs. Publish 43
 - Execute Page 43
 - Publish 43
 - Refreshing pages and previews 44
 - Publishing the web project 44
 - V9-Platinum 44
- Exploring your web application.....45
 - Entering new records 46
 - Changing a record 47
 - Deleting a record 47
 - Searching for records 47
 - Entering search criteria 48
 - Clearing search criteria 48
 - Sorting the records 49
 - Sending email from a link 49
- 3 Solid Security**
 - How the material is organized53
 - Understanding Alpha Five Security.....53
 - Looking at the “Basic Steps” 54
 - Preparation for the lesson.55
 - Borrowing files for a new project 55
 - Creating a new web project 56
 - Adding existing pages to a web project 56
 - Adding an existing web component to a project 56
 - Duplicating pages and components 57
 - Removing a web component from a page 57
 - Changing the link on a page 58

- Remove files from the project 58
- Implementing security 60
 - Turning security on 60
 - Enabling the Web Security Framework 60
 - Framework Setting 60
 - Turning security off 60
 - Quick test 61
 - Creating a redirect page 61
 - Defining the security settings 61
 - Web Security Configuration 62
 - Security Policy 62
 - Login Options 63
 - User ID Options 63
 - Password Settings 64
 - Lost Data Recovery Options 65
 - Customize Options 65
 - Defining the Users and Groups 65
 - Users 65
 - Case Sensitivity 66
 - Security Groups 66
 - Import/Export user data 67
- Creating a Login web component 68
 - Login Navigator 68
 - Entering the Login options 69
 - Show Remember Me? 69
 - Entering the Change Password settings 70
 - Annotating the component 70
 - Placing the component on the web page 70
 - Changing Login component messages 71
 - User file—Required data missing 71
 - Password confirm doesn't match 71
- Setting up page security 71
 - Scenario 71
 - Choosing the page assignments 72
 - Grouping page permissions 74
 - Defining file type permissions 74
 - Always Allowed 74
 - Always denied 75
 - Add and remove file types 75
 - Navigating within folders 76
 - V9–Platinum Edition 76
- Adding security to the web component 76
 - Annotate It! 77
 - Column View restriction 77
 - Delete record restrictions 77
 - Update (change) record restrictions 77

Insert (Add) record restrictions	78
Publishing the security files	78
General & Page configurations	78
Users and Groups	79
Testing the security settings	79
Keep a chart	79
Publish changed files	80
No Login?	81
Changing a password	81
User change	81
Updating remote user data	82
Administrator change	84
Publishing page and security files simultaneously	84
Publish or perish	84
Both at once	84
Reviewing the security procedure	84
Changed files	85
Handy things to know about security	85
Locking and unlocking users	85
User and Groups dialog	85
Security Policy	85
Entering, editing and validating users	85
Pre-Built Functions	85
Troubleshooting	86
403 Forbidden message	86
Security settings not applied	86
Page does not exist	86
Security files missing	86
GUID not unique	86
Guid created automatically	87
Miscellaneous notes	87
User Level Security	87
Reviewing the security procedure.....	87
Redirect pages	88
Page and Web Component security	88
Using the charts	88
Conventions	88
Missing options	88
Security Policy Chart	91
Security User ID & Password Validation Chart	98
Login Component Chart	102

4 Amazing Attributes

How this lesson is organized	111
Developing a strategy	111
Understanding how the Application Server works	111
Understanding web constraints	112

- Understanding the Client / Server model 113
- Xbasic and the web 114
 - A5 Operation 115
- Thinking ahead 115
 - Think small 115
 - Diagraming your design 116
 - See your design 116
 - Planning your database files 117
 - There is another way 118
 - Sending files to the server 118
- Preparation for the lesson 118
 - Copying a web project 118
 - Copy files to a new project 119
 - Adding existing web components 120
- Learning the 3 P's: Project, Publish and Profile 121
 - Understanding Projects 121
 - Additional Folders 121
 - Add file to folder 121
 - back to parent folder 122
 - Moving files within
 - Web Project folders 122
 - Renaming a Web Project 122
 - Understanding Publishing 123
 - URL 123
 - Local Webroot 123
 - Webroot files 123
 - Web Project files 124
 - Publishing your files 124
 - Sort files 126
 - V9-Platinum Edition 126
 - Quick Publish 127
 - V9-Platinum 127
 - Security and files to be published dialogs 127
 - Understanding Profiles 128
 - Local Webroot profile 128
 - New Profiles 129
- Getting control of the Web Projects Control Panel 129
 - Reviewing the menus 129
 - Finding your way around 130
 - Using the Top Menu 130
 - V9-Platinum 132
 - Using the Upper Toolbar 134
 - Using the Web Projects Control Panel toolbar 135
 - Right click menu 137
 - Copy files to existing project 139
 - Copy files to a new project 139

Creating Calculated Fields.....	141
Using the Expression Builder	143
Using the work space	144
The elements	145
Select Fields	145
Select Values	146
Function Finder	147
Getting Help in the Expression Builder	148
Finding the right function	148
Calculated Fields	149
Variables	149
Library Entry	149
Using the Expression Builder keyboard	151
Arithmetic Operators	152
Logical Operators	152
True & False	152
Comparison Operators	152
Toolbar	153
Easy expression writing	153
Text requirement	154
Creating an expression we can use	154
Remove field blanks	154
Calculated Values expression	155
Using the Filter Builder	156
Using the filter genie	157
Excluding records	158
Viewing the expression	158
Logical Expression	159
Viewing more filtering options	159
Unique records	159
Sub-select options	159
Finishing the filter	159
Creating a Maintenance Component.....	159
Form navigator	160
Choosing tables for packing/reindexing	161
one or all tables	161
Single table only	162
Combination of tables	162
Testing the component	163
Maintenance Component Chart	165
How the material is organized	171
Preparation for the lesson	171
Understanding Component Type options	171
Reviewing layout possibilities	172
Tabular view	172

5 Grand Grids
Part 1: Setup

- Columnar 173
 - Stacked Columnar 173
- Choosing Read Only or Updateable 173
 - Control Types 173
 - Read only: Grid or Detail View 174
 - Updateable: Grid or Detail View 174
 - Converting later 174
- Reviewing the Search part option 174
 - Quick Search 174
- Reviewing the Detail View options 175
 - Converting Later 175
- Defining the Grid > Data Source..... 175
 - Remote databases 176
- Defining the Grid > Query 176
 - Refresh Fields 177
- Understanding this Read Only option 178
 - Defining the Primary Key(s) 178
- Using a View in a grid component 179
 - Adding and joining tables 180
 - Apply and Cancel Edits 182
 - Saving edits 182
- Understanding Arguments..... 184
 - Session Variable 184
 - Terminology 184
 - Field for argument 184
 - Defining the Argument 185
 - Define variable 186
 - Defining the prompt and its page 187
 - Control Types 187
 - Choices 187
 - Default value 188
- Filtering records 188
 - Filtering with an Argument 188
 - Testing the Argument and filter 189
 - Testing variables 190
 - Filtering records with a expression 190
- Ordering records..... 191
 - Reverse order 192
 - Copy Expression 192
 - Sort Direction 192
- Defining Events for the Grid component 193
- Annotating the Grid component 194
- How the material is organized..... 199
- Preparation for the lesson 199
- Pick and Click your way to the desired setting 199

6 Grand Grids
Part 2: Fields

Clarifying the options	199
Finding it later	200
Hints	200
Understanding the conventions for the charts	200
Screen vs. chart	200
HTML Editor	202
Have fun and play along	202
Alternate Column d	203
Defining the Field properties	205
Selecting fields first	205
Adding and removing fields	205
Adding new fields to the source table	205
Setting up field security	206
Adjusting your layout	206
Column Spacer	206
Row Spacer	206
Combine cells	206
Changing Read Only to Editable	207
Eligible fields	208
Adding a Lookup	209
Understanding hidden controls	210
Hide row or column	210
Hidden control	210
Choosing a Control Type	210
Selecting Control Types	211
Grid Fields	211
Search Part fields	212
Detail View fields	212
Charts for fields in Grid, Search and Detail View parts	213
Exploring the field properties charts	213
Organizing shared properties	213
Missing settings	213
Label Control Type Chart	216
Link Control Type Chart	222
TextBox and TextArea Control Types Chart	224
Checkbox, DropDownBox & RadioButton Control Types Chart	227
Image, Calendar, Custom & Hidden Control Types Chart	231
7 Grand Grids	
Part 3: Properties	
How the material is organized	237
Preparation for the lesson	237
Reviewing the Grid properties	237
Options	237
Creating a Quick Search	238
Searching with a Textbox	239
Case sensitivity	239
QBF Searches	239

Searching the sub-set of records 240
 Clearing the Quick Search 240
 Creating a DropDownBox search 241
 List Types 241
 Searching with a Checkbox 243
 Searching with a RadioButton 244
 Display different value 244
 Setting up Grid security..... 245
 Reviewing the Search Properties..... 246
 Options 246
 Defining choices 246
 Reviewing the Detail View Properties 248
 Defining the Update Settings 248
 Charts for Grid, Search, Detail View and Grid Update properties..... 250
 Organizing shared properties 250
 Grid Properties Chart 252
 Grid Quick Search Properties Chart 258
 Search Part Properties Chart 261
 Detail View Properties Chart 264
 Grid Update Properties Chart 269

8 Commanding Components

How this lesson is organized 273
 Preparation for the lesson 273
 Combining tables with a View 274
 Understanding the difference between DBF & SQL 274
 Live data 274
 Result set 274
 Set vs. Query 275
 SELECT statement 275
 Creating another View web component 275
 Creating a Lookup for data entry 277
 Field Mapping 278
 Connecting tables with a Grid Linker 279
 Description 279
 Select and Link 279
 More options 280
 Overriding the component settings 281
 Xbasic aids 283
 New record rows 284
 Choosing a record 284
 Entering a new record 284
 Understanding the automatically entered fields 285
 Refining the child grid 285
 Adding a calculated field 287
 Consolidating grids with the Tabbed Gridlinker 289
 Link on common field 289

- Increased performance 289
- Reading the Description 290
- Understanding Select and Link 290
 - Other Options 291
- Understanding the Tabbed Grid Linker properties 292
 - Tab position 292
 - Customize page layout 292
 - Initial child to display 292
 - Customize tab button template 292
 - Auto-scroll to child grid 292
 - Tab order 293
- Creating a page menu with the Navigation System.....294
 - Creating the navigation pages 294
 - Understanding Description settings 294
 - Understanding Navigation System settings 295
 - Adding and deleting Nodes 296
 - Add child and sibling 297
 - Delete node 298
 - Delete tree 298
 - Drop Down Menu 299
 - Flyover menu 299
 - Understanding Node Setting Types 299
 - security for multiple nodes 299
 - Defining the Navigation System 300
 - Moving a menu item 302
 - Understanding Navigation placeholders 302
 - Component cells 303
 - Testing the component 305
 - Troubleshooting 306
- Understanding Dialog components.....306
 - Description 307
 - After Validate Event 307
 - Creating a Dialog component 308
 - Component Type 308
 - Form > Controls 308
 - Form > Properties 309
- Creating a grid that looks like a dialog311
 - Updating and deleting records 311
 - Quick find 313
 - Adding records 313
- Creating flexible layouts314
 - Video demonstration 314
 - Modifying the grid component layout 314
 - Frame and group commands 315
 - Modifying the Dialog component layout 316
 - Frame and group commands 316

- Heading 317
- Exploring more Dialog layout options 317
- Printing a report to a PDF file 318
 - Using a dialog to create a button 318
 - Validation 319
 - Variables 320
 - Filter and Order Builders 320
- Understanding Path Alias 321
 - Portability 321
- Printing an Invoice report 322
- Printing SQL reports 323

9 Graphic Goodies

- How the material is organized..... 327
- Preparation for the lesson 327
- Understanding A5W, HTML & CSS 327
 - Reviewing A5W pages 328
 - Adding text 328
 - Adding an image 328
 - Adding a component 328
 - Deleting a component 328
 - Understanding standard HTML pages 329
 - Understanding CSS Style Sheets 329
 - Stylesheet Language 329
 - Defines document presentation 329
 - Changing Styles 330
 - V9-Platinum 330
 - Global style replacement 330
 - Change one component 331
 - Change selected components 331
 - Change all components 331
 - Descriptions 332
- The HTML Editor 332
 - EnterPrise Edition only 334
 - Viewing the pages 335
 - Open Pages 335
- Adding images to your grids 335
- Changing the In-Line Style 336
 - Single cell formatting 337
 - Formatting options 338
- Adding a heading to your component 339
 - Removing freeform edits 340
- Understanding relative URLs..... 340
 - Viewing a project example 341
 - Creating a relative URL hyperlink 342
- Building and rendering pages..... 343
 - Importing pages from a web design program 343

- Using frames 344
- Using the CSS Editor 344
 - Multiple access points 344
- Troubleshooting345
 - What's to come 345
 - Putting your app online 345
 - Helpful hints for all 346

10 Sexy SQL Secrets

- How the material is organized349
- Preparation for the lesson349
- Understanding compatibility and connectivity349
 - Connecting to SQL back-end databases 351
 - Using the built-in drivers 351
 - Working with Microsoft Access© 351
 - System catalog permission 351
 - Working with Microsoft Excel 352
 - Table names 352
 - Worksheets 352
 - Named ranges 352
 - Working with Oracle 352
 - Portable SQL or Java trigger 353
 - Defining the Data Source.....353
 - Understanding the Connection String.....354
 - Named Connection String 354
 - Specify Connection string 354
 - Opening a previously saved connection string 354
 - Creating a new connection string 355
 - Multiple saved connections 357
 - Creating a connection without saving it 358
 - Completing the query options.....359
 - Choosing the Table or View 359
 - Refreshing Fields 360
 - Creating an SQL Select Statement 361
 - SQL Builder 361
 - Filter 362
 - Order 362
 - Printing SQL Reports.....364
 - Publishing the SQL Reports Library 365
 - Tips for SQL Reports 366
 - Understanding Active-Link tables366
 - V9-Platinum 366
 - Active-Link and web applications 367
 - Direct connection 367
 - Active-Link 367
 - Understanding server connections367
 - Using a professional hosting service 368

**11 Exhilarating
Xbasic**

Changing the connection string 368

How this chapter is organized 373

Preparation for the lesson 374

Creating a cascading selection list..... 374

 Creating the pages 375

 Dialog component page 375

 Redirect page 375

 Creating the Dialog and Controls 375

 Populating the lists 376

 Add blank value 376

 Pixels not inches 378

 Control filter: 1 variable 378

 Parameter Mapping: 1 variable 379

 Do not show previous selection 379

 Control filter: 2 variables 379

 Parameter mapping: 2 variables 380

 Building the filter 380

 Temporary Link Control 381

 Copy syntax 383

 Creating a filter expression for the variables 383

 Paste syntax 383

 Comment out 383

 Initialize variable 383

 Annotate 384

 Placeholders 384

 DBF character filters 384

 Script writing aids 385

 Field and control names 385

 Connect elements 387

 Urlencode 387

 Redirect page 387

 Copy filter builder code 388

 Remove temporary link 388

 Using the Dialog 389

 Publish selected files 389

Using variables in scripts 391

 Dimensioning variables 391

 Dim explained 391

 Convert field type 392

Constructing expressions with Variables 392

 Using a character string in the URL 393

 Interactive Window 393

 Getting a quoted example 394

 Giving the variable a value for testing 395

 Delimiter 395
