

# Table of Contents

## Introduction

<b>Alpha Five for the web.....</b>	<b>ix</b>
What this book is all about	ix
Acknowledgments	x
<b>Getting Started .....</b>	<b>x</b>
What you need to know	x
The equipment you will need	x
How this book is set up	x
File naming convention	x
About the screen shots	xi
Footnotes	xi
To quote or not to quote	xi
Special note for readers of previous editions	xi
Download and CD contents	xii
Opening the companion files	xii
Using Alpha Five Help	xii
<b>Installing the lesson files .....</b>	<b>xii</b>
To install lesson files from the CD	xiii
Installing the lessons for the Electronic Download Edition	xiii
What files are included?	xiii
<b>Support .....</b>	<b>xiii</b>

## 1 Sensational System

Keeping up	2
<b>Alpha Five Today .....</b>	<b>3</b>
<b>Developing for mobile devices .....</b>	<b>3</b>
Keeping it simple	4
<b>Compatibility with remote data.....</b>	<b>4</b>
<b>How Alpha Five interacts with database types .....</b>	<b>5</b>
<b>AJAX smooths and speeds your application?.....</b>	<b>6</b>
<b>Developing applications .....</b>	<b>6</b>
Using your application on the web	6
<b>Understanding Web Components .....</b>	<b>7</b>
Creating web pages	10
Putting it together	11
<b>Proceeding with the lessons.....</b>	<b>11</b>
<b>Newbies take note .....</b>	<b>11</b>
Browsers call the shots	12
Understanding web based databases	12
Back in the day...	12
Additional notes on AJAX	13
Alpha Five and AJAX	
by Selwyn Rabins	13
Sending data the traditional way	14
Sending data with AJAX	14
Understanding the process	14
Seeing is believing	14
What is best? SQL or DBF???	14

## 2 Marvelous Moves

Using Alpha Five Help .....	18
How the material is organized.....	19
Preparation for the lessons.....	19
Understanding Workspaces.....	19
Opening the Web Projects Control Panel .....	21
Starting the Application Server 21	
Creating a new Web Project 22	
Creating a Grid Component .....	23
Defining the Component Type 24	
Defining the Data Source 25	
Defining the Query 26	
Selecting Fields for the Grid 26	
Setting the Field Properties 27	
Defining the Grid Properties 28	
Setting up the Search part elements 30	
Setting up the Detail View elements 30	
Saving the component 35	
Previewing Web Components.....	35
Viewing at the Preview tab 35	
Viewing in Live Preview 36	
Viewing in Working Preview 36	
Viewing in the Brower 37	
Testing the component design 37	
Understanding Modelless and Modal windows 41	
Revising an existing component 42	
Creating a Web Page.....	44
Adding an Image to both page and project 44	
Understanding the tabs 46	
Creating page that holds a web component 47	
Executing the page 48	
Publishing a page 49	
Understanding URL's in Alpha Five 49	
Creating link to another page 50	
Inserting a component on a web page 50	
Viewing and using the Web Project.....	52
Execute vs. Publish 52	
Publishing the web project 52	
Making more modifications 54	
Searching for properties.....	54
Learning the terms 55	
Finding properties 55	
More about Grid Components.....	55
Using wild cards to search records 55	
Using the In-line Style Editor 57	
Understanding the Code section 57	
Annotating the grid component 58	
Entering Xbasic 58	
Viewing the entry in the table 58	
Getting a quick start 58	
Getting More Info.....	59

## 3 Heavenly Help!

How the material is organized.....	63
Understanding the Documentation Viewer (DV) .....	63
Getting off to a strong start 64	

---

## 4 Solid Security

Display and navigation	64
Searching for topic pages	66
Saving page references	69
Taking Notes	70
Printing topics	71
Updating the documentation	72
Window style	73
Restoring open pages	73
Sending feedback	73
<b>Using the Video Finder .....</b>	<b>73</b>
Filtering	74
<b>How the material is organized .....</b>	<b>79</b>
<b>Understanding Alpha Five Security .....</b>	<b>79</b>
Looking at the “Basic Steps”	80
<b>Preparation for the lesson.....</b>	<b>81</b>
Borrowing files for a new project	81
Creating a new web project	81
Adding existing pages to a web project	82
Adding an existing web component to a project	82
Adding image files	82
Duplicating pages and components	83
Removing a web component from a page	83
Changing the link on a page	83
Locating the project files	84
<b>Implementing security .....</b>	<b>85</b>
Turning security on	85
Turning security off	86
Creating a redirect page	87
Defining the security settings	87
Defining the Users and Groups	91
Importing and exporting user lists	93
<b>Creating a Login web component .....</b>	<b>93</b>
Understanding the Login component	93
Defining the Login section	94
Defining the Change Password section	95
Changing Login component messages	96
Annotating and saving the component	96
Placing the component on the web page	96
<b>Setting up page security .....</b>	<b>96</b>
Choosing the page assignments	97
Defining file type permissions	98
Grouping page permissions	99
Setting folder security	99
Working with Security on	101
<b>Adding security to the web component.....</b>	<b>101</b>
Securing grid components and reports	102
Restricting column access and editing privileges	104
Viewing in Live Preview or Execute	106
<b>Publishing the security files .....</b>	<b>106</b>
Keeping track of the assignments	107
Testing page security	108
Getting the login page back	109
Testing with the back button	110

<b>Changing a password .....</b>	<b>110</b>
Making an “on-line” change	111
Checking the password change in Alpha Five	111
<b>Retrieving the User &amp; Group information .....</b>	<b>111</b>
Understanding where the data is stored	111
Setting up for the transfer	112
Retrieving the data	113
<b>Safeguarding the Users &amp; Groups data .....</b>	<b>114</b>
Understanding Web Security Data Published	115
Understanding Restrict Web Security Data Publish	115
Understanding Auto-restrict Web Security Data.	117
One more word of caution	117
<b>Handy things to know about security .....</b>	<b>118</b>
Publishing page and security files simultaneously	118
Locking and unlocking users	118
Entering, editing and validating users	118
Understanding the 403 Forbidden message	118
Miscellaneous notes	120
<b>Reviewing the security procedure .....</b>	<b>120</b>
Creating pages and components	120
Turning security on and off	120
Activating security changes	121
<b>5 Amazing Attributes</b>	
<b>How this lesson is organized .....</b>	<b>125</b>
<b>Developing a strategy .....</b>	<b>125</b>
Understanding how the Application Server works	125
Understanding web constraints	126
Understanding the Client / Server model	127
Xbasic and the web	128
<b>Thinking ahead .....</b>	<b>129</b>
Diagramming your design	129
Locating your database files	130
Transferring the files	131
<b>Preparation for the lesson.....</b>	<b>132</b>
Copying a web project	132
<b>Learning the 3 P's: Project, Profile and Publish .....</b>	<b>133</b>
Understanding Projects	134
Understanding Profiles	135
Understanding Publishing	135
Finding the files	138
<b>Getting control of the Web Projects Control Panel.....</b>	<b>139</b>
Reviewing the menus	139
Finding your way around	139
Using the Top Menu	140
Using the Upper Toolbar	144
Using the Web Projects Control Panel toolbar	144
Right click menu	147
<b>Understanding calculated field types.....</b>	<b>150</b>
Using server-side calculations	150
Using client-side calculations	151
Using conditional images and styles	151
Creating filters	152
<b>Using the Calculated Values Builder .....</b>	<b>152</b>
<b>Using the Expression Builder .....</b>	<b>154</b>

---

Using the work space	156
Using the Expression Builder keyboard	162
Understanding Operators	162
Using the toolbar	163
Writing expressions	163
Creating an expression we can use	164
<b>Understanding summary calculations .....</b>	<b>166</b>
Creating a summary field	167
Copying property values to multiple fields at the same time	167
Centering text	169
Creating a summary footer for the grid	169
Creating a summary footer for each page	170
Adding conditional color & images	170
Adding a conditional image to a grid row	171
<b>Creating client-side calculations .....</b>	<b>173</b>
Defining the calculation	175
Rounding a numeric calculation	176
Formatting existing records	177
Rounding numeric entries	178
Understanding case sensitivity	178
Adding conditional formatting	179
Testing formatting and case sensitivity	180
Defining the show / hide expression	181
Enable / Disable field entry	182
Defining labels and other control types	183
<b>Using the Filter Builder.....</b>	<b>183</b>
Using the filter genie	184
Ordering the records	185
<b>Creating a Maintenance Component.....</b>	<b>185</b>
Choosing tables for packing/reindexing	187
Testing the component	188
<b>Getting more info .....</b>	<b>189</b>
<b>6 Setup Settings</b>	
<b>Getting More Info .....</b>	<b>192</b>
<b>How the material is organized .....</b>	<b>193</b>
<b>Preparation for the lesson.....</b>	<b>193</b>
<b>Choosing Read Only or Updateable .....</b>	<b>193</b>
Converting later	195
Understanding the Updateable and Editable Notices	195
Changing a Read-only Grid to Updateable (Editable)	196
<b>Understanding editing options for updateable grids .....</b>	<b>197</b>
Editing data with RowOnDemand	200
Editing data with AllRows	201
Trapping actions	203
Being consistent	204
Understanding multi-user editing	204
<b>Using a grid template to save time and trouble .....</b>	<b>204</b>
Move, delete or rename templates	206
Using the System templates	207
Creating a template	207
<b>Using a Stacked Columnar layout .....</b>	<b>208</b>
Grouping fields into rows	209
Adding Static Text labels	209

Adding a Merge Cell heading	210
Adding a Row Spacer	210
Using a Master Template	211
Adding a Collapse Bar	212
<b>Understanding the Form (Columnar) component .....</b>	<b>213</b>
Resizing images	214
Grouping fields with a frame	214
Snaking the records	215
Opening the Detail View in a window	216
Filtering the records	217
Grouping the records	217
<b>Defining the Grid &gt; Data Source .....</b>	<b>219</b>
<b>Defining the Grid &gt; Query.....</b>	<b>220</b>
Understanding the Primary Key(s)	221
<b>Combining tables with a View .....</b>	<b>221</b>
Understanding the difference between DBF & SQL	221
Creating a View	223
Adding and joining tables	223
Editing the Join	224
Defining a Primary Key for a View	225
Choosing the fields	225
Formatting a numeric field	226
<b>Understanding Arguments .....</b>	<b>226</b>
Defining the Argument	226
Defining the Prompt	227
Using the argument in a filter	228
Testing the argument and filter	228
Adding a drop down box	228
Defining the Prompt Page	229
<b>Ordering records .....</b>	<b>230</b>
<b>Taking a quick look at the Code section .....</b>	<b>231</b>
Editing events	231
<b>Annotating the Grid component .....</b>	<b>232</b>

## 7 Fun with Fields

<b>How the material is organized.....</b>	<b>235</b>
<b>Preparation for the lesson.....</b>	<b>236</b>
<b>Notes on fields.....</b>	<b>236</b>
Adding and removing fields	236
<b>Choosing a Control Type.....</b>	<b>237</b>
Understanding hidden controls	237
Selecting Control Types	238
<b>Understanding Date and Time Pickers in Grids .....</b>	<b>239</b>
Using the Date and Time pickers	240
Choosing the right tools	241
Understanding the Properties settings	241
Understanding the Field property settings	242
Defining the date and time fields	244
Dynamically setting the low value for a date	245
Understanding table entry	246
<b>Creating Checkbox, Radio Button and Drop Down Box controls.....</b>	<b>247</b>
Creating a checkbox	248
Choosing the type of list	248
Creating a Static list	248
Creating a Dynamic list	250

Understanding Add to List	250
<b>Creating an Edit-Combo List / Lookup.....</b>	<b>252</b>
Defining a static list	252
Defining a dynamic list	252
Centering a textbox	255
Entering data with a lookup	255
Adding a dynamic filter	256
Using an Edit-Combo box in the Search part	258
Forcing the user to choose from the list	259
Having fun with the Freeform areas	259
<b>Creating an Auto Suggest List / Lookup.....</b>	<b>260</b>
Reviewing the optional properties	261
Understanding the Search Type	261
Entering multiple selections	262
<b>Using Action JavaScript to auto-fill fields .....</b>	<b>263</b>
Defining a Zip Code lookup and fill in	263
Filling in fields from a table	264
<b>Looking up Data with a Grid Component .....</b>	<b>265</b>
Part 1. Creating the lookup grid	266
Part 2. Creating the data entry grid	267
Defining and mapping the lookup	268
Formatting the numeric fields	269
Defining the client-side calculations	270
Defining Update Settings	270
<b>A. Connecting grids in a Master-Detail or One-to-Many Relationship .....</b>	<b>271</b>
Adding a [Linked Grid]	273
Editing records in a Form layout	274
Using a lookup grid to enter a new record	274
Understanding the automatically entered fields	274
<b>B. Enhancing the Form layout with Special Controls.....</b>	<b>275</b>
Adding a Frame	276
Adding a tabbed interface	276
Turning a Frame into a Collapse Bar	277
Changing the tabs to accordions	278
Defining the pages that open first	278
Animating the display	278
Displaying data in columns	279
Placing the columns side by side	279
Nesting tabs within tabs	280
<b>C. Using the Image and Container Controls .....</b>	<b>280</b>
Defining the conditional image	281
Placing the fields side-by-side	282
Troubleshooting	282
<b>D. Searching with a Form Layout .....</b>	<b>283</b>
<b>E. Adding a Button that Prints a Report .....</b>	<b>283</b>
Adding the button	284
Creating a dynamic label	284
Defining the filter	284
Previewing the receipt	286
<b>Validating field data .....</b>	<b>287</b>
Understanding validation	287
Setting validation at the component level	287
Setting validation at the table level	288
Defining custom validations for components	288

## 8 Dynamite Dialogs

<b>Getting More Info.....</b>	<b>290</b>
<b>How the material is organized.....</b>	<b>293</b>
What is a dialog? 293	
What's the difference? 293	
<b>Preparation for the lesson.....</b>	<b>294</b>
Videos for this chapter 294	
<b>Creating a Dialog.....</b>	<b>295</b>
Overview of the Dialog Builder 295	
Adding a single control 297	
Adding multiple controls at the same time 298	
Adding controls from a table 300	
Using Breaks in layout design 301	
Using the Control Library 302	
Adding controls from the clipboard 304	
<b>Editing control properties .....</b>	<b>305</b>
Editing in Tree & Wysiwyg views 308	
<b>Understanding Repeating Sections.....</b>	<b>309</b>
Creating an invoice with totals 311	
Creating calculations 312	
<b>Submitting the dialog data to an existing table.....</b>	<b>312</b>
Binding the data 313	
Defining the Server-side code 314	
Submitting the data to the table 316	
Editing the data 316	
Understanding auto-increment controls 317	
<b>Creating a single table based on controls in a dialog .....</b>	<b>317</b>
Creating the Alias 318	
Binding the table fields 319	
Defining the Field Specifications 319	
Defining the Table 319	
Creating the Table 320	
Viewing the table 320	
Understanding Primary Keys 320	
Changing the field binding 320	
<b>Creating multiple tables based on dialogs with Repeating Sections.....</b>	<b>322</b>
Creating the Aliases 322	
Selecting the Linking Field 323	
Defining the Field Specifications 323	
Defining the Tables 324	
Defining the Server-side code 325	
Changing the Linking Field to auto-increment 325	
<b>More information on Dialogs.....</b>	<b>326</b>
Refreshing the table 326	
Reviewing or changing Data Binding 327	
Clearing the Data Binding 327	
Adding and binding new controls 328	
Repositioning the controls 329	
Special controls 329	
IFrame Control 329	
Lookups 330	
Validating the data entries 330	
Genie style layouts 331	
Assigning a Primary Key 331	

---

Permissions and Security 331  
 Recalculating the HTML and JavaScript 332

## 9 Perfect Packages

<b>How the material is organized .....</b>	<b>335</b>
<b>Understanding the Tabbed UI Builder.....</b>	<b>336</b>
Creating a Tabbed UI 338	
Adding controls 338	
Adding frames 340	
Adding tabs 341	
Editing an object 341	
Changing width of buttons and panel 341	
Adding Other Controls 341	
Testing at the Browser 341	
Understanding the Browser navigation warning 342	
Giving the page a title 342	
Adding a header 342	
Adding a footer 342	
Understanding A5W pages for Tabbed UI's 343	
Adding a Home page 343	
Modifying the objects 344	
Understanding Linked Resources 346	
<b>Understanding the Page Layout Builder.....</b>	<b>346</b>
Entering the display settings 347	
Displaying a Page Layout component in a Tabbed UI 349	
Adding an External Web Page 350	
<b>Understanding the Navigation System web component.....</b>	<b>352</b>
Understanding the Description page 352	
Understanding the Navigation System settings 353	
Understanding the menu structure 354	
Adding and deleting Children, Siblings, Nodes and Trees 354	
Moving the nodes 354	
Undo & Redo 355	
Deleting nodes 355	
Understanding node settings 355	
Previewing the Navigation System menu 357	
Switching from onclick to onmouseover 357	
Using the Information page 357	
Including a Tabbed UI 357	
<b>Creating a Navigation System menu.....</b>	<b>358</b>
Developing a plan 358	
Creating the pages 358	
Designing the Navigation System component 359	
Defining nodes with pages 360	
Defining nodes without pages 360	
Previewing the Navigation System menu 361	
<b>Placing the Navigation System component on pages.....</b>	<b>361</b>
Inserting the component 362	
Understanding the Container 362	
Changing the menu type 363	
Modifying the table border 363	
Adding text and component to the table 364	
Setting up the other pages 364	
Viewing the Navigation System 365	
Adjusting the menu items 365	

Troubleshooting	365
<b>Understanding the Feature Packs .....</b>	<b>366</b>
Free Feature Packs!	366
Handy Tools	366
Images & Files	367
Custom windows	369
Converting DBF to SQL	370
Version 11 Feature Packs	370
<b>10 Sexy SQL Secrets</b>	
<b>How the material is organized.....</b>	<b>375</b>
<b>Preparation for the lesson.....</b>	<b>375</b>
<b>Connecting your SQL data to Alpha Five .....</b>	<b>375</b>
Understanding the Data Source	376
<b>Understanding the Connection String .....</b>	<b>377</b>
Opening a previously saved connection string	377
Creating a new connection string	378
Creating a temporary connection	380
<b>Completing the SQL Query pane .....</b>	<b>381</b>
Using Table or View	381
Creating a SQL Select Statement	383
Selecting fields for the grid	386
<b>Printing SQL Reports.....</b>	<b>386</b>
Publishing the SQL Reports Library	387
Setting the default value	388
Moving on	388
<b>Using Alpha Five with SQL on the Desktop.....</b>	<b>388</b>
Creating an Active-Link table	388
Active-Link and web applications	391
Using web application forms on the desktop	392
<b>Understanding server connections .....</b>	<b>392</b>
Testing vs. Live	392
Using a professional hosting service	392
Understanding portability	393
<b>Getting more info .....</b>	<b>393</b>
<b>11 Internet Installation</b>	
<b>How the material is organized.....</b>	<b>397</b>
<b>Deciding how to put your application on-line .....</b>	<b>397</b>
Changing servers	398
Using a Domain Name	398
<b>Reviewing the Application Server settings.....</b>	<b>398</b>
Understanding the settings	399
General Tab	399
Logging Tab	401
Sessions Tab	402
Errors Tab	403
Access Tab	404
SSL Tab	404

Creating the Profile	412
Publishing to a local server	414
Publishing to a LAN	414
Publishing to ISP/remote	415
Defining the Publish details	415
Publishing the Library files (SQL users only)	416
Viewing the settings	416
Publishing to the new Profile	417
<b>Using a hosting company to put your web app on-line .....</b>	<b>419</b>
Understanding the server situation	419
Flying with an Alpha Software partner	419
<b>Using your own server to put your web app on-line .....</b>	<b>419</b>
Using your ISP for hosting	420
Understanding Firewalls	421
Using a static IP Address	422
Configuring your computer's IP address	422
Using Port 80	422
Naming the default page	423
Watching the clock	423
Wrapping up	423

## 12 Practical Pointers

<b>How the material is organized .....</b>	<b>427</b>
<b>Using Functions and Expressions .....</b>	<b>427</b>
<b>Back up, Restore, E-mail and Update .....</b>	<b>427</b>
Web component backup / restore	428
Backing up the Workspace	429
Using One Step Backup	431
Requiring regular backups	431
Restoring the Workspace	431
E-mailing a workspace	432
E-mailing selected web project element(s)	432
Alpha Five software updates	432
<b>Understanding Variables .....</b>	<b>433</b>
<b>Using the Database Explorer .....</b>	<b>434</b>
Opening the Database Explorer	434
<b>Tidbits .....</b>	<b>436</b>
Root directory location	436
Getting rid of the\$\$\$\$\$\$\$\$\$	436
Query by Form Syntax	437
Correcting “Calculated Fields” terminology	438
<b>More about Security .....</b>	<b>438</b>
Understanding Login Expiration Policy and Time	439
Understanding “Remember Me” (aka automatic login)	440
Adding a logout option to the Login component	441
<b>More about Relative URL’s .....</b>	<b>441</b>
<b>Understanding the Project Properties .....</b>	<b>442</b>
Defining the Project Style	443
<b>Changing the In-line Style .....</b>	<b>444</b>
Font settings	445
Text settings	445
Edge and Background settings	446
Position and Layout Settings	446
“Other,” Lists, CSS and IE Specific settings	447
Hiding text display	447

Watching where you are working!	448
Defining Conditional Style	448
<b>Understanding Path Alias.....</b>	<b>449</b>
<b>Exploring error messages .....</b>	<b>449</b>
Adding the server signature	450
<b>Saving expressions in the Script Library.....</b>	<b>450</b>
Compiling your scripts into a library (AEX) file	450
<b>Exploring Xbasic References.....</b>	<b>451</b>
Understanding Xbasic	451
Using the Xbasic toolbox	452
Assuring successful script writing	454
