

Table of Contents

Frances M. Peake, professional database developer, has this to say about the Alpha Anywhere Made Easy books ... v
More reader testimonials from around the world ... v

Introduction

Alpha Anywhere for Web & Mobile	vii
What this book is all about	vii
Acknowledgments	vii
Getting Started	vii
What you need to know	viii
The equipment you will need	viii
How this book is set up	viii
File naming convention	viii
About the screen shots	viii
Footnotes	viii
To quote or not to quote	ix
Special note for readers of previous editions	ix
Download and CD contents	ix
Using Alpha Anywhere Help	ix
Installing the Lesson Files	ix
To install lesson files from the CD	x
Installing the lessons for the Electronic Download Edition	x
What files are included?	x
Support	x

1 Dazzling Design

Please read the Introduction!	2
Keeping up	2
Using Alpha Anywhere Help	2
Welcome!	3
What's in a name?	3
What this book is about	4
Should I use Grid or UX components?	4
How to use this manual	5
ABC Seminars	5
Detaching the Working Preview Window	6
Understanding the Client / Server model	8
Xbasic and the web	9
What is best? SQL or DBF???	10
On with the show!	12

2 Luscious Lists (UX)

How this Chapter is Organized	15
Shortcuts to the builders	15
Using a List Control to Filter a Report	16
Creating the UX component	17

- Adding a List Control 17
- Adding a Panel Card 18
- Viewing the report 19
- Adding a button that opens a filtered report 20
- Adding a Panel Navigator 22
- Giving the panel a header with a title 23
- Placing the button at the top of the panel 23

Understanding List Control sources:

- A. Using Static data 25**
- B. Using Data from a SQL Database 26**
 - Defining the query 27
 - Using the SQL genie 27
- C. Using a DBF Data Source 29**
- D. Using a Custom Data Source 30**
 - Defining the function 31
 - Returning a single value 31
 - Defining the List Control attributes 33
 - Returning the value from a drop down box 34
 - Defining the drop down box 35
 - Modifying the code 35

Improving the Appearance of Lists:

- A. Adjusting the Column Widths 37**
 - Defining relative (flex) column widths 37
- B. Understanding “Fill Container” options 38**
 - Filling the width of the container 39
 - Placing a border around the list 40
 - Placing a border around the container 41
- C. Adjusting the Length of a List 42**
- D. Defining FreeForm Layouts 44**
 - Adding another layout 45
 - Defining the layout 45
 - Switching layouts by changing the device orientation 46
 - Selecting the layout style with a combo box 47
 - Using a template to design the freeform layout 48
 - Exploring more videos 52
- E. Defining Computed Columns 53**
 - Defining server-side calculations 54
 - Defining client-side calculations 56
- F. Displaying Images 57**
 - Displaying images from the database 58
 - Defining conditional images 58
- G. Defining Conditional Styling 60**
 - Defining server-side conditional formatting 61
 - Defining client-side conditional styling 62
 - Understanding the onItemDraw event 63
- H. Understanding Record Limits & Pagination 65**
 - Viewing the options 66
 - Setting record limits and pagination 68
 - Adding navigation buttons or icons 68
 - Identifying the page or record 69
 - Limiting the number of records displayed 69
 - Navigating with buttons or icons 70

- Fetching more records 70
- Auto fetching records 71

Improving the Way Lists Work:

A. Adding Buttons 72

- Enhancing the appearance of the button 73
- Showing a button conditionally 75
- Opening another UX component 76

B. Grouping Records 76

- Defining the group breaks 77
- Defining the pagination 78
- Defining the column sorting 78
- Adding the buttons 79
- Using the header text lookup dictionary 79

C. Creating Cascading Lists 80

- Using arguments in filters 81
- Setting unique values 82
- Turning off column titles 82
- Defining list width at the List Builder 82
- Defining the component 83
- Defining the cascading lists 83
- Using the SQL Genie 86

D. Using List Rows to Edit the Database 87

- Populating the fields with list row data 88
- Giving a row focus when the list is initially rendered 89
- Automatically populating controls when list is initially rendered 89
- Adding buttons and refreshing the list 90
- Editing the data and viewing the result in the list 91
- Understanding List vs. List + Field in onSelect event 91
- Populating unbound controls with data from a list 92

Searching and Filtering Lists:

A. Understanding Server- and Client-side Searches and Filters 93

B. Creating Server-side Searches 95

- Ordering the list 96
- Adding the DropDownList control 96
- Adding a search button 97
- Adding a button that refreshes a list 98
- Adding a record count 98
- Creating a textbox search 99
- Adding a keyword search 100

C. Creating Client-side Searches 101

- Creating an all fields search with a button 101
- Creating key press searches 102

D. Searching and Navigating Records 103

- Navigator #1: The Slider 104
- Navigator #2: The List 105
- Navigator #3: The Navigation Icons 105
- Configuring the Keyword Search 106

E. Creating Geography Searches 107

Video Library:

More List Control Features 108

3 Priceless Panels (UX)

How this Chapter is Organized115
Understanding Panel Cards, Panel Navigators and Panel Layouts115
Understanding Quick Panels 119
 Using predefined templates 121

Defining Panel Cards:

- A. Aligning Text in Headers and Footers 122**
 Centering the text 123
 Understanding CSS Classes 123
- B. Aligning Buttons in Panel Cards 124**
 Aligning buttons in the Panel Card itself 125
 Aligning buttons in the Header / Footer 125
 Making a button conditional and maintaining its position 126
 Positioning elements absolutely 127
- C. Creating an Action Sheet and a Panel Window 128**
 Closing the action sheet container window 130
 Creating a panel window 131
- D. Defining Fixed Positions for Objects 133**

Defining Panel Navigators:

- A. Understanding Navigation 135**
 Using the device for navigation 136
 Using buttons for navigation 138
 Using lists for navigation 141
- B. Adding Locator Icons 144**
- C. Change Layout on Orientation Change 145**
- D. Defining a Custom onSwipe Event 146**

Defining Panel Layouts:

- A. Understanding Flow in Panel Layouts 148**
 Understanding flow direction 148
 Understanding 'before' & 'after' 149
- B. Understanding how Panel Card size affects Panel Layouts 150**
- C. Understanding Docking 151**
- D. Docked Panel Display: Docked Panel Controller button 153**
 Understanding the display methods 154
 Understanding dock lock flow 154
 Understanding the dock options 154
 Defining the buttons 155
- E. Docked Panel Display: Flow Collapse Button 156**
 Defining the settings 157
- F. Docked Panel Display: Nested Panel Layouts 158**

Video Library:

More on Panels 160

4 Offline or Online (UX)

How the Chapter is Organized165
 Understanding the terminology 165
Understanding Disconnected (Offline) Applications169
 Understanding the design approach 171
 Understanding development 172

- Understanding synchronization 173
- Understanding 'write conflicts' 175
- Creating a List with Detail View and Search Part..... 176**
 - Using the genie to do it all in one step 177
 - Performing CRUD operations 180
 - Locating the properties 180
 - Modifying Detail View properties 185
 - Searching and editing records when online 188
- Creating a "Disconnected" Application 189**
 - Defining Local Storage settings 189
 - Defining the Search Part settings 190
 - Defining the Detail View settings 192
 - Creating a custom CSS Class 193
 - Completing the Detail View options 195
 - Using the database records when offline 195
- Understanding Hierarchical Data 197**
- Viewing Local Storage contents..... 201**
 - Understanding the Local Storage Manager control 202
 - Naming the space 206
 - Freeing up space 207
- Data Connection: Comparing Data Binding & List Detail View Methods..... 207**
- Associating a List Detail View with an Existing List..... 208**
 - Adding the List Detail View 209
- Adding a List Search Part to an Existing List 210**
 - Tips on using the Search Part 211
 - Using Query by Form 211
- Adding More Buttons..... 212**
 - Understanding the List Detail View buttons 212
 - Understanding the Search Part buttons 213
- More Notes..... 213**

5 Optimizing the UX

- How the Chapter is Organized 219**

Defining Containers:

A. Creating a Tabbed Interface 220

- Using the Tab Control and Tab Pane controls 220

B. Using the Container Control 221

- Understanding the Container control 221

- Creating columns 223

- Defining a show/hide condition for a group of controls 224

- Creating invoices and other master / detail relationships 224

- Grouping controls in UX with Panels 225

- Placing buttons in groups 226

- Creating a SpinList controls 227

- Displaying controls in a different place on the layout 227

- Opening controls in a pop-up window 228

- Assigning flexible widths to UX controls 229

- Placing data on a pre-defined form 231

- Using CSS to override spacing of controls 235

C. Using Containers to Align Controls 236

Choosing the Correct Device Layout:

A. Understanding Responsive Layout Design 238

- Creating a simple responsive design 239
- Understanding the Responsive Layout genie 240
- Defining Rule #1: Landscape 240
- Defining the actions for Rule #1 241
- Defining Rule #2: Portrait 242
- Defining the actions for Rule #2 242
- Viewing the JavaScript 242
- Other helpful features 242

B. Creating a Complex Responsive Design 243

Creating Tables Based on Controls:

A. Creating a Single Table Based on Controls in a UX 244

- Creating the alias 245
- Binding the table fields 246
- Defining the field specifications 246
- Defining the table 247
- Creating the table 247
- Viewing the table 247
- Understanding primary keys 247
- Changing the field binding 248

B. Creating Multiple Tables Based on a UX with Repeating Sections 249

- Creating the aliases 250
- Selecting the linking field 251
- Defining the field specifications 251
- Defining the tables 251
- Creating the table 252
- Defining the submit button code 252
- Changing the linking field to auto-increment 253

More UX Elements:

Refreshing the table.....	254
Viewing 1000's of Rows in a List	255
Virtualizing a list 255	
Adding a Scroller to a List.....	257
Hints for Data Binding	258
Reviewing or changing data binding 258	
Clearing the data binding 258	
Adding and binding new controls 259	
Assigning a primary key 260	
Displaying a Video or Web Page.....	260
More Good Stuff	262
Organizing a complex UX component 262	
Recalculating the HTML and JavaScript 262	
Internationalization 262	
Lookups 262	
Validating data entries 262	
Permissions and security 263	
PhoneGap 263	

6 Masterful Menus

How the Chapter is Organized	267
---	------------

Menus for Mobile Applications:

A. Understanding the Menu Builder 270

Creating the menu 271
Defining the “leaf” items 272

B. Building a Menu with Docked Panels 275

Understanding the Panel Layouts 277
Configuring the menu lists 277
Configuring buttons for docked panels 278
Configuring the docked Panel Cards 279
Configuring the menu selections 279
Configuring the swipe action 281

C. Understanding ‘Split View’ Menus 282

Creating a standard split view menu 283
Creating a split view menu with icons & panels 284
Understanding the ListMenu control 288

Menus for Web Applications:

A. Understanding the Tabbed UI Builder 289

Creating a Tabbed UI 291
Adding controls 292
Adding frames 294
Adding tabs 295
Changing width of buttons and panel 296
Understanding the browser navigation warning 297
Giving the page a URL title 297
Adding a header 297
Adding a footer 297
Adding home page content 298
Understanding A5W pages for Tabbed UI’s 299
Adding and editing objects 300
Understanding linked resources 302
Additional options 302

B. Understanding the Page Layout Builder component 303

Entering the display settings 304
Displaying a Page Layout component in a Tabbed UI 305
Adding an external web page 307
Creating the A5W page 308

C. Understanding the Navigation System 309

Sample application 310
Developing a plan 311
Understanding the description page 311
Understanding the component settings 312
Understanding the menu structure 313
Adding and deleting children, siblings, nodes and trees 313
Moving the nodes 314
Undo & redo 314
Deleting nodes 314
Understanding node settings 315
Previewing the Navigation System menu 316
Switching from onclick to onmouseover 316
Using the information page 316
Including a Tabbed UI 316
Inserting the component on the pages 317
Viewing the Navigation System 319
Adjusting the menu items 319
Troubleshooting 319

7 Gifted Grids

How the material is organized.....	323
Choosing Read Only or Updateable	323
Converting later	325
Understanding the updateable and editable notices	325
Changing a read-only Grid to updateable (editable)	326
Understanding Editing Options for Updateable Grids.....	327
Editing data with RowOnDemand	330
Editing data with AllRows	332
Trapping actions	334
Being consistent	334
Understanding multi-user editing	334
Using a Grid Template to Save Time and Trouble	335
Move, delete or rename templates	336
Using the system templates	337
Creating a template	337
Using a Stacked Columnar Layout	338
Grouping fields into rows	340
Adding static text labels	340
Adding a merge cell heading	341
Adding a row spacer	341
Using a master template	342
Adding a collapse bar	343
Understanding the Form (Columnar) Component.....	344
Resizing images	346
Grouping fields with a frame	346
Snaking the records	347
Opening the Detail View in a window	348
Filtering the records	348
Grouping the records	349
Understanding Arguments	351
Defining the argument	352
Defining the prompt	353
Using the argument in a filter	353
Testing the argument and filter	353
Adding a drop down box	354
Defining the prompt page	354
Ordering Records.....	355
Taking a Quick Look at the Code Section.....	356
Editing events	357
Annotating the Grid Component.....	357

8 Sexy SQL Secrets

How the Chapter is Organized	361
Using connection strings developed for this book	361
Creating and Managing Connection Strings	362
Understanding the data source	362
Editing an existing connection string	362
Creating a new connection string	363
Using an existing connection string in a Grid	363
Creating an “Ad Hoc” (temporary) connection string in a Grid	364
Understanding connection strings in a UX component	365

Completing the SQL Query Pane in a Grid 365
 Using table or view 366
Creating a SQL Select Statement 368
 Selecting fields for the Grid 371

Understanding Alpha Anywhere Reports:

A. Creating SQL Reports 372
 Creating a quick report 373
B. Printing SQL Reports 374
 Publishing the SQL reports library 375
 Setting the default value 376

More Important Info:

Understanding server connections 376
 Testing vs. live 376
 Using a professional hosting service 376
 Understanding portability 377
Using Alpha Anywhere with SQL on the Desktop 377
 Using web application components on the desktop 377

9 Heavenly Help Plus!

How the Chapter is Organized 381
Understanding the Documentation Viewer (DV) 382
 Getting off to a strong start 382
 Display and navigation 382
 Searching for topic pages 384
 Saving page references 387
 Taking notes 388
 Printing topics 390
 Updating the documentation 390
 Window style 391
 Restoring open pages 391
 Sending feedback 391
Using the Video Finder 392
 Filtering 392
 Refreshing 393
 Preferences 393

10 Practical Pointers

How the Chapter is Organized 397
Searching for Properties 397
 Learning the terms 398
 Finding properties 398
Changing the In-line Style 398
 Watching where you are working! 399
Pre-Defined Packages (aka Feature Packs)..... 399
 Categories 399
Using Functions and Expressions 400
Webroot Folder 401
Using the Database Explorer 402
Picking CSS Colors..... 403
 Color names supported by all browsers 403
Tidbits 403

Correcting “Calculated Fields” terminology	404
Relative URL’s	404
Exploring Error Messages	405
Adding the server signature	406
Saving Expressions in the Script Library	406
Compiling your scripts into a library (AEX) file	406
Exploring Xbasic References	407
Understanding Xbasic	407
Using the Xbasic tools	408
Assuring successful script writing	410
Additional videos	410
Converting from DBF to SQL – There’s a Genie for That	410
Creating a Maintenance Component	411
Choosing tables for packing/reindexing	413
Testing the component	414
Help!	415
Alpha Software website	415
Tips and tricks	416
More Books from Liberty Manuals	416
Designing reports	417
Learning Xbasic	417
 Index	 419
